RES 502 - 202 (3.0 credits)

Interdisciplinary Case Analysis and Research Design (Master's Level)

2016-2017W, Term 2
Wednesday 9am-12pm, AERL 107/108

Instructor
Prof. Stephanie E. Chang
Office: rm. 241, West Mall Annex (1933 West Mall)
Tel: 604-827-5054, email: stephanie.chang@ubc.ca
Office hours: by appointment

Course Overview
This course explores how to design effective, interdisciplinary research for addressing a broad range of problems in the area of environment and sustainability. Case studies are used to develop understanding and insight into research design fundamentals, including developing researchable topics, reviewing relevant literature, and selecting suitable research methods for evidence collection and analysis. Cases are selected to encompass a broad range of research methods (qualitative, quantitative, and mixed), and to demonstrate their strengths and limitations. Students will gain experience in developing and communicating research designs through written proposals and oral presentations. This section of RES 502 is designed for master's students.

Course Objectives
The goals of this course are to help students gain:

- literacy in research methods;
- familiarity with effective research design; and
- experience in developing a defensible research proposal.

While both qualitative and quantitative methods will be discussed, as well as mixed methods research design, the emphasis will remain on methodological literacy and research design. The course thus serves to complement, rather than substitute for, in-depth courses on research methods.

Learning Outcomes
By the end of this course, students will be able to:

- Identify different types of research methods and describe their strengths and limitations;
- Explain, using illustrative cases, why different methods might be appropriate and effective in different research contexts;
- Describe the major components of research proposals, differentiating between different types of proposals;
- Critique a research proposal using common evaluation criteria;
- Demonstrate familiarity with effective research design by developing and defending a research proposal.
Course Organization

Course Format

This is a seminar course that meets once a week for 3 hours. The first half of the course focuses on acquiring literacy in research methods and familiarity with effective research design. In this part of the course, the class format will typically consist of an informal lecture, discussion of assigned readings, and discussion of topics that are informed by homework assignments. Research methods and design will be introduced through a series of case studies that illustrate how different approaches can be utilized to investigate interdisciplinary problems related to the environment and sustainability.

The second half of the course focuses on developing skills to prepare a defensible proposal for the student's own thesis research. The class format in this part of the course will generally consist of an informal lecture, discussion of an example proposal, and an in-class workshop that focuses on the students' iterative drafts of various sections of their proposals. The workshop format entails presenting draft material, receiving peer feedback, and providing comments in turn on classmates' work. Guidelines for providing peer feedback will be provided.

Course Schedule

Course Requirements and Grading

There will be two assignments, each of which will take the form of a written research proposal and accompanying presentation (described in Course Assignments, below).

<table>
<thead>
<tr>
<th>% of grade</th>
<th>Course element</th>
<th>Due date</th>
</tr>
</thead>
<tbody>
<tr>
<td>30%</td>
<td>Assignment #1 – Retrospective proposal</td>
<td>February 15, 2017</td>
</tr>
<tr>
<td>30%</td>
<td>Assignment #2 – Research proposal</td>
<td>April 5, 2017</td>
</tr>
<tr>
<td>20%</td>
<td>Class preparation (homework)</td>
<td>Throughout term</td>
</tr>
<tr>
<td>20%</td>
<td>Class participation</td>
<td>Throughout term</td>
</tr>
</tbody>
</table>

In addition to these two graded assignments, homework will be assigned in some weeks (listed under "preparation" in the Course Outline below) to ensure that students are prepared for the next class. These assignments will be marked only on a Satisfactory/Unsatisfactory basis.
Class participation is essential in this course. Students are expected to attend and participate actively in all classes, including occasionally leading in-class discussions. Peer feedback is an important component of this course, and students are expected to critique their classmates' work in a thoughtful, constructive, and professional manner.

Assessment Criteria
Assignments will be graded on the following criteria, as applicable:

- Appropriate application of course concepts;
- Identification and use of relevant sources;
- Originality;
- Clarity and completeness of documentation;
- Clarity and logic of explanation, reasoning and argument; and
- Professional writing/presentation.

Course Policies
Points will be taken off for late assignments as follows:

<table>
<thead>
<tr>
<th>Days past due</th>
<th>Points deducted (/100)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-7 days</td>
<td>10 points</td>
</tr>
<tr>
<td>8-14 days</td>
<td>20 points</td>
</tr>
<tr>
<td>&gt;14 days</td>
<td>assignment will not be graded</td>
</tr>
</tbody>
</table>

Students with extenuating circumstances should notify the instructor as soon as possible.

Course Materials
There is no textbook for this course. Readings will be compiled in a course reader and will be available electronically through Blackboard Connect. Readings will generally consist of academic journal articles and book chapters. These will be supplemented by examples and resources presented in class.

Readings
(in order of assignment)

### Course Assignments

<table>
<thead>
<tr>
<th>No.</th>
<th>Topic</th>
<th>Learning objective</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Retrospective proposal</td>
<td>Develop familiarity with essential elements of a research proposal. Practice writing and defending a proposal.</td>
</tr>
<tr>
<td>2</td>
<td>Own research proposal</td>
<td>Gain experience developing a research proposal. Produce a proposal suitable for a master's thesis.</td>
</tr>
</tbody>
</table>

Assignment #1 will take the form of a concise research proposal. Students will select a published paper and retrospectively write a proposal for the research described in that paper. The retrospective proposals will be presented in class and be defended in a Q&A session. The topic should be different from the student's intended master's thesis.

In Assignment #2, students will work on a proposal for their own master's thesis. Weekly homework (listed under "preparation" in the Course Outline below), together with in-class discussion and feedback, are designed to help students develop this proposal iteratively and progressively throughout the second half of the course.

| 1 | W 1/4 | Course introduction  
Topics: Self-introductions; syllabus; interdisciplinary research |
| 2 | W 1/11 | Research questions  
Topics: Inspiration; types, scope, scale; "researchable" questions  
Readings: Oberg (2011), Ch.7 "Marking Your Playground"  
du Toit (2014), Ch.2.2 "Research Design"  
Preparation: Select paper/thesis; be prepared to discuss its research questions |
| 3 | W 1/18 | From literature review to revised questions  
Topics: Reading and writing literature reviews; gaps and contributions  
Readings: Farthing (2016) Ch.4 "A Justification for Your Research Question"  
Chang et al. (2014) "Consequences of Oil Spills"  
Preparation: For selected paper/thesis, be prepared to discuss its literature review, findings, and contributions |
| 4 | W 1/25 | Methods and cases (I) - oil spills  
Topics: Research methods and design  
Readings: Silliman et al. (2012) "Degradation and resilience in Louisiana salt marshes after the BP-Deepwater Horizon oil spill"  
Gill et al. (2012) "The Exxon Valdez and BP oil spills:.... social and psychological impacts"  
Mayer et al. (2015) "Compensation and community corrosion:.... the Deepwater Horizon oil spill" |
| 5 | W 2/1 | Methods and cases (II) - water scarcity  
Topics: Research methods and design (cont'd)  
Readings: Mekonnen and Hoekstra (2012) "A Global Assessment of the Water Footprint of Farm Animal Products"  
Fielding et al. (2013) "An Experimental Test of Voluntary Strategies to Promote Urban Water Demand Management"  
Harris-Lovett et al. (2015) "Beyond User Acceptance: A Legitimacy Framework for Potable Water Reuse in California"  
Wutich and Gravlee (2010) Ch.9 "Water Decision-Makers in a Desert City: Text Analysis and Environmental Social Science"  
Assignments: #1 (retrospective proposal) distributed |
# Methods and cases (III) - synthesis

**Topics:** Research methods and design (cont'd); proposal types and elements  
**Preparation:** Identify a master's thesis related to either oil spills or water scarcity; summarize its research design  
**Assignments:** Identify and read published paper for Assignment #1

---

## Presentations

**Topics:** Student presentations of Assignment #1  
**Assignments:** #1 due

---

## NO CLASS – Midterm break

---

## II. Research Proposals

### Initial research questions

**Topics:** Problem context, research ideas, initial research questions; literature review strategies  
**Preparation:** Initial research question for master's thesis  
**Assignments:** #2 (own research proposal) distributed

### Revised research questions and literature review

**Topics:** Draft literature reviews; justifying research questions  
**Preparation:** Draft literature review (organized notes), revised questions

### Initial data and methods

**Topics:** Data types, data collection strategies; research ethics; feasibility, contingency plans; justifying data collection methods  
**Preparation:** Detailed outline of data collection

### Revised data, methods, and analysis

**Topics:** Connecting research questions, data collection, and analysis  
**Preparation:** Revised data collection plan, outline of analysis

### Presentations

**Topics:** Student presentations of Assignment #2

### Presentations (cont'd)

**Topics:** Student presentations of Assignment #2 (cont'd)  
**Assignments:** #2 due
