The world is nearing the point-of-no-return for catastrophic and irreversible climate change. Despite the urgency of addressing the climate crisis, no other country is as deeply divided on it than the United States. The Phil Lind Initiative 2019 series at UBC will explore the politics of climate change in the US, with visits from some of the world’s foremost intellectuals on the subject. UBC students are also participating in GPP 591, a seminar that explores these issues.
