

RESEARCH SEMINAR WITH

DR. ANDREA SUÁREZ SERRANO

Mesoamerican Center for Sustainable Development
in the Tropical Dry Forest (CEMEDE)
National University of Costa Rica

ABOUT THE PRESENTER

Dr. Andrea Suárez Serrano is Professor and Research Director at the Water Resources Center for Central America and the Caribbean (HIDROCEC) at the Mesoamerican Center for Sustainable Development in the Tropical Dry Forest (CEMEDE), National University of Costa Rica.

She has extensive research experience in aquatic ecology, ecotoxicology, and water management. Dr. Suárez Serrano has developed and coordinated the Hydrological Engineering program at HIDROCEC, where she has also taught courses on socioenvironmental sustainability and natural resources, freshwater ecosystems, and culture and sustainability. She has helped organize several international meetings and conferences in Costa Rica on water treatment and water governance, as well as leading capacity-building workshops.
